

## FIRST CLASS TREND ANALYSIS PROGRAMS FOR AGRICULTURAL AVIATION OPERATORS

Spectro® | Jet-Care®, the recognised leaders in the provision of engine trend monitoring and laboratory analysis services, offers a comprehensive analysis program specifically designed for the PT6 and TPE331 series of engines.

With over 40 years' experience providing first class, independent analysis services to the global aviation industry we understand the challenges you face in maintaining and operating your aircraft. Unscheduled maintenance and downtime can be costly and inconvenient; which is why providing early warning of problems that compromise engine efficiency and operation are top priority for us at Spectro | Jet-Care.

Once enrolled on the Jet-Care GPA program you can expect superior service, fast turnaround and an AOG service, if required. Routine reports are issued monthly, however, if we have any questions or concerns once your data is processed we will contact you immediately. Trend reports are available on our online portal, webECHO™, 24/7/365.

### WHY CHOOSE SPECTRO | JET-CARE?

- **Save time** - through the early detection of problems that could compromise engine efficiency
- **Save money** - identifying issues early means less expensive repairs
- **Peace of mind** - we are the only independent engine trend monitoring company <sup>(1)</sup> with Lloyds Register Quality Assurance accreditation for AS9100 and ISO9001 Quality Management Standards
- **Easy access to your results** - your reports and data are just one click away with our online portal, webECHO™
- **Data** - we accept data from Electronics International MVP-50T.

NB: Please note we will only accept electronic data for these aircraft types.

### FIND OUT MORE

Take a look at our website [www.jet-care.com](http://www.jet-care.com) to find out more about our engine trend monitoring and laboratory analysis programs.

If you would like to request a quote complete the reverse side of this flyer, scan and email to us or return by fax:
